

# SYSTRAN LANGUAGES

## SYSTRAN offers 55 of the most commonly used languages in the world.

More than 140 language pairs are available to meet the ever growing need for multilingual communication. Others can be developed upon request.

### SYSTRAN translation models

#### Achieve greater accuracy with SYSTRAN domain-specific translation models...

To offer you optimal translation quality, we have leveraged our language assets to build generic translation models for specific domains. With SYSTRAN Enterprise Server 8, you can benefit from **10 domain-specific translation models** in the following fields: News, Colloquial, Defense & Security, IT, Economics, Travel, Pharma & Life Science, Patent, Automotive and Legal.

#### ...or ask us to build yours

Translation models can be built from a corporate corpus (bilingual and monolingual text). If your company doesn't have enough corpora, we can provide access to our own Corpus Factory, a substantial internal database encompassing monolingual and bilingual text with free or purchased intellectual property rights.
