

AI Powered Machine Translation for the U.S. Government Community

Since 1968, the US Government has trusted SYSTRAN to be its leading provider of intelligent language technologies. SYSTRAN retains its pioneering role through current innovations in Pure Neural Machine Translation (PNMT), a form of Artificial Intelligence (AI).

PNMT can improve the way government agencies perform these actions:

TRANSLATION

Translation of digital content for on-demand understanding of the source message.

TRIAGE

Triage of multilingual, big data content for data analytics and e-discovery.

COMMUNICATION

Communication by chat, email and social media in multiple languages.

SECURE

- ✓ Protect data by installing accredited technology behind a firewall.

CUSTOMIZABLE

- ✓ Select the languages and toolkits needed, and tailor to specific domains of interest.

EXTENSIBLE

- ✓ Integrates easily into a platform using standard APIs and partner connectors.

SCALABLE

- ✓ Size to the number of users, machines, data, etc., on your program.

150+ Language Pairs:

The Americas
Asia
Europe
Middle East
Africa

Designed with Government Requirements in Mind

SYSTRAN language combinations:
SYSTRAN offers 54+ languages in more than
150+ language pairs; other pairs
possible upon request.

A PROVEN LEADER

SYSTRAN has been helping commercial, defense, and national security organizations process mission-critical data for over 50 years. We operate globally with locations in the United States, Europe, and Asia.

As the first software company to introduce Neural Machine Translation technology, SYSTRAN is continuing to lead the innovation in language technologies. SYSTRAN's Pure Neural Machine Translation (PNMT) products use Neural Networks and Deep Learning algorithms to achieve unprecedented translation quality that is near human translation levels.

CURRENT TECHNOLOGY INSTALLATIONS ON GOVERNMENT CLIENT LOCATIONS:

INTELLIGENCE COMMUNITY
ARMY, AIR FORCE, NAVY
LAW ENFORCEMENT AGENCIES
LARGE INTEGRATOR CONTRACTORS

LET'S GET STARTED:

- Hold discovery meeting with stakeholders.
- View a live demo.
- Test drive PNMT with a trial license.
- Learn how to create your own domain models using modelStudio.
- Talk with our technical experts about SYSTRAN's AI efforts.

CORE COMPETENCIES

- + Machine Learning for Specified Domains
 - + Research & Development in AI for Language Applications
- + Machine Translation Software for On-Premise Enterprise, Cloud and Desktop Platforms
- + Integration with Automatic Speech Recognition (ASR) and Optical Character Recognition (OCR) systems

CORPORATE DATA

Socio-economic: Small Business

- + NAICS: 511210, 541511 and 541930
- + DUNS: 066175266
- + CAGE Code: 1A429
- +GSA Schedule Contact Number: GS-35F-0364V
- + Accept Credit and Purchase Cards: Yes
