language technology

**Designed with Government
Requirements in Mind**

Secure: Protect your data by installing the technology behind your firewall

Extensible: Integrates easily into your platform using standard APIs and partner connectors

Scalable: Size to the number of users, machines, data, etc., on your program

Customizable: Select the languages and toolkits you need, and tailor to your domains of interest

Since 1968, the US Government has trusted SYSTRAN to be its leading provider of intelligent language technologies. SYSTRAN retains its pioneering role through current innovations in Pure Neural Machine Translation (PNMT), a form of Artificial Intelligence (AI). By investing in SYSTRAN technologies, government agencies are able to conduct these activities in real-time with unprecedented quality output:

- + Triage multilingual, big data content for data analytics and e-discovery.
- + Translate digital content for on-demand understanding of the source message.
- + Communicate by text in multiple languages.

Core Competencies

- + Machine Translation Software for the Desktop, Enterprise and Cloud Platforms
- + Machine Learning for Specified Domains
- + Linguistic Development Kit (LDK)
- + Integration with Automatic Speech Recognition (ASR) and Optical Character Recognition (OCR) systems

Corporate Data

- + **Socio-economic:** Small Business
- + **NAICS:** 511210, 541511 and 541930
- + **DUNS:** 066175266
- + **CAGE Code:** 1A429
- + **GSA Schedule Contract Number:** GS-35F-0364V
- + **Accept Credit and Purchase Cards:** Yes

SYSTRAN language combinations: SYSTRAN offers 45 languages in more than 140 language pairs; other pairs possible upon request.

RETURN ON VALUE (ROV)

Even though SYSTRAN's translation software cannot replace the cognitive skills of a human translator, the ROV makes the software a viable option for many use cases. For example, a 2500-word document may take a professional translator one work day to complete, but would take SYSTRAN's software a matter of seconds - at a fraction of the cost.

ABOUT SYSTRAN

SYSTRAN has been helping commercial, defense, and national security organizations capture mission-critical data for the last 49 years. We operate globally with locations in Americas, Europe, and Asia.

As the first software company to introduce Neural Machine Translation technology, SYSTRAN is continuing to lead the innovation in language technologies. SYSTRAN's brand new Purely Neural Machine Translation (PNMT) products utilize Neural Networks and Deep Learning algorithms to achieve unprecedented translation quality that is near human translation levels.

For the latest information on PNMT technology, please visit our blog: www.blog.systrangroup.com.
