

Sinequa and SYSTRAN Join Forces to Exhibit at Milipol, the 19th Worldwide Exhibition of Internal State Security

Combined Solutions Empower Defense and Security Organizations to Transform Intelligence Data into Insight

PARIS, France – November 10, 2015 – [Sinequa](#), a leader in real-time Big Data search and analytics and [SYSTRAN](#), the world leader in language translation software, today announced that they will join forces to exhibit at [Milipol](#) to be held at Paris-Nord Villepinte – November 17-20th, 2015. In the context of their partnership, Sinequa and SYSTRAN provide state of the art technologies enabling leading defense and security organizations to transform COMINT/OSINT data into insight.

Today's intelligence and law enforcement agencies around the world are facing ever-growing threats from civil conflicts, weapons of mass destruction, nuclear and chemical arms, money laundering to terrorist acts and cyberattacks. Intelligence analysts need an intuitive way to extract insight from massive-scale data contained in various internal and external sources – this includes everything from signals and transcripts to fund transfers, e-mails and social media. The combination of Sinequa Big Data search and analytics platform along SYSTRAN's instant translation solutions for more than 45 languages empower defense and security organizations to get real-time information at their fingertips for quick analysis and decision.

"Over the years, Sinequa Big Data Search and Analytics has been deployed by leading defense and intelligence agencies facing huge challenges in terms of data collection, indexing and text analytics," said Xavier Pornain, VP Sales & Alliances, Sinequa. *"In combination, SYSTRAN's automated translation solutions and Sinequa Big Data Search and Analytics provide these organizations with powerful and innovative technology to detect and process critical information in multiple languages while providing an exhaustive view of a given topic."*

"Sinequa offers strong analytics for structured and textual data in a number of languages. With SYSTRAN, our joint customers can extend the analysis of textual data to more than 45 languages," said Gilles Montier, Sales Director, SYSTRAN.

Sinequa and SYSTRAN will be exhibiting in the Transmission, Communication and Interception Hall respectively in booths #5F248 and #5G247.

➤ About SYSTRAN

For over four decades, SYSTRAN has been the market leader in language-translation products and solutions, covering all types of platforms, from desktop to internet and enterprise servers.

To help organizations enhance multilingual communication and increase productivity, SYSTRAN delivers real-time language solutions for internal collaboration, search, eDiscovery, content management, online customer support and e-Commerce.

With the ability to facilitate communication in 130+ language combinations, SYSTRAN is the leading choice of global companies, Defense and Security organizations, and Language Service Providers. SYSTRAN is also the official translation solutions provider for the S-Translator, a default-embedded app on the Samsung Galaxy S and Note series.

Since its early beginnings, SYSTRAN has been pioneering advances in machine translation and Natural Language Processing. Its latest achievement, a new-generation Hybrid MT, combines the predictability and language consistency of rule-based machine translation with the fluency of statistical MT.

SYSTRAN is headquartered in Seoul, South Korea; Paris, France; and San Diego, USA.
